

In response to Frank T.B. Schuster's letter of February 1982 (TAP Issue #72), wherein he complains about wasting TAP space on drug information, I wish to offer the following explanation: Altho TAP had a beginning that was narrow in scope, limited primarily to phone freeking, it has evolved to include all available technology. And chemistry is perhaps the most powerful technology that we have. Chemistry is the power of Life, the power of Death, and the power of Dope. What things are more important than these? What science is more encompassing? I will give the reader one example each of life & death & dope, and let him decide the worth of chemical technology.

LIFE: For many years, BHT (butylated hydroxy-toluene) has been added in small amounts to many commercial food products as a preservative. It is an anti-oxidant and free radical deactivator, and statistical drops in gastro-intestinal cancer in the last two decades have been attributed to anti-oxidant food additives. (See "Secrets of Life Extension," p. 45, by John Mann (1980) \$7.95 from And/Or Press, P.O. Box 2246, Berkeley, CA 94702.)

In addition to having anti-cancer properties, BHT is an effective cure for herpes and psoriasis, and has life-extending properties. Presently, the FDA has only approved BHT as a food additive -- herpes victims will have to suffer for about five more years until the FDA bureaucracy approves it as a medicine. Meanwhile, pro-freedom technologists are using BHT and other anti-oxidants such as Deanol as life extenders. Complete information on obtaining and using BHT is given in the Quarterly Journal of the Megahealth Society, Volume 2, No. 2 (Summer 1981) pages 8-9. The journal and other information can be obtained by sending \$3 to the Megahealth Society, P.O. Box 1684, Manhattan Beach, CA 90266.

DEATH: Today's state-of-the-art poisons are the most horrible, deadly, insidious substances imaginable. Originally I had intended to give an example of one of my favorite goodies and how to use it as a self-defense weapon. But on second thought I've decided against it to spare the gentle reader the displeasure of having the necessarily unpleasant description of chemical mayhem burden his consciousness. Also, I don't want the legal liability when some technologist "neutralizes" an enemy, nor do I want the remorse when I hear that an uninvited bungler in the ranks accidentally "snuffs" himself. Besides, anyone interested in pursuing the forbidden knowledge of the black arts of chemistry can do so by himself in the general literature of forensic chemistry and toxicology at a public or college library.

DOPE: Yohimbine HCl. An active alkaloid found in yohimbine bark. It is a mild stimulant and has an aphrodisiac effect due to its direct stimulation of the spinal nerves that influence erection, and it increases circulation in the pelvic region. It also has euphoric effects. Like Deanol, this may be a drug of the future. New drugs should not only get you high, they should be wholesome & healthy, too, with none of the addictive and psychotic side effects of earlier drugs.

Yohimbine HCl is available from the Inner Center, P.O. Box 362, Hermosa Beach, CA 90254. Send them 25¢ and a s.a.s.e. for their literature. Note that the Inner Center only sells these drugs to members of the Church of the Tree of Life as religious "sacraments." By making drugs that are not yet prohibited our sacraments, we can exercise our God given right to drug substances under our First Amendment right to religious freedom. Send a \$1 or \$2 donation to the Church of the Tree of Life, 405 Columbus Ave., San Francisco, CA 94133, and request to become a member of the church. They will send you a church ID card and their literature, and this will enable you to buy the sacraments from the Inner Center and make everything legal. Expect a 3-4 week wait on your ID card.

In summary, it is important to note that it is not the individual drugs that are critical; rather, it's the ideas behind the substances: life extension, self-defense, and chemical pleasure -- all incorporating chemical technology. Life extension can be practiced now; techniques are available. How much is 20 more years of life and staying younger longer worth? Or in a life-and-death

TAP
Room 603
147 W. 42 St.
New York 10036

JULY - AUGUST 1982

No. 76

survival situation where you have to defend yourself from some psychopath, what's the technology worth that will enable you to live? And if you seek pleasure, recreation, or religious experience with substances, what's it worth to know how to do it legally, to stay out of jail, and to know which drugs will get you high that are not deleterious?

Mr. Shuster recommends publishing chem-tec information in a druggie magazine rather than in TAP. First, what publisher would not be afraid to print it? As far as I know, TAP is the only free alternate technology forum for phone freeking, computer banditry, and underground chemistry. Chem-tec information is not meant for general audiences, but for people who have more than a casual interest in the sciences and the ability to comprehend it; it is meant for people who believe in the freedom to have this information. There are many alternate technologies, and TAP is the proper forum. After all, TAP is the Technological Assistance Program, and a broad exposure to many disciplines will enhance our scope and understanding.

The information in TAP is supplied by readers. I'm glad to share with TAP readers valuable information that many technologists would greedily keep to themselves. It is through sharing that TAP exists, and through sharing we all become enriched. It's my contention that sharing chem-tec information is valuable to us. If anyone is wasting TAP space, it is Mr. Schuster with his complaints about drugs; however, if he is willing to share his technology with us (if he has any), I for one would be more than willing to read it and would appreciate his generosity.

IN REBUTTAL

By Al Mundy

In issue #72, Paul Montgomery, a so-called professional physical and computer security consultant, takes exception to my article; saying, it was inaccurate. Let me answer his allegations. I would never retain Paul Montgomery as a consultant because he doesn't believe in the impossible. It is my belief that a real consultant has an open mind to the impossible: what may seem impossible is all but possible. The probability of the impossible occurring is not zero. Remember when people thought it was impossible to fly? Now, we have landed a man on the moon. It's the same for television, the electric light, portable computers, etc.

However, forgive this digression, the picking of mushroom or spool driver equipped locks is definitely possible. Paul Montgomery's inability to pick open a lock with mushroom or spool drivers may be due to the fact that the tension or torque being applied to the wrench is too excessive. Another point I would like to add is that I hardly ever use a pick gun. I consider it too noisy and ineffective in certain situations. Also, one will not be able to attempt the picking of a Medeco cylinder if one doesn't master the art of picking locks with mushroom drivers first.

ALARMS (II)
Signaling devices and tamper proofing

Once an alarm is triggered it will respond in three different ways. Audibly, silently or both. There are 2 main devices used for alarm signaling, horns and bells. Bells use a feedback system to generate the armature movement since they run on DC.

To disable a bell you can place a piece of thick foam where the striker(c) hits the bell, stick a wedge of metal in point A, or cut the spring(b). Or if you can, remove the bell off the ringer coil assembly. Horns are a bit more difficult to dispose of. My favorite way is to tape all the openings except a 1" hole in the front. Then through this opening one pours plaster until the horn is full. After the plaster hardens the horn is useless. To stop this tampering most horns and bells are put in a metal box that has tamper switches.

A) vents
B) front tamper swt.
C) terminal strip
D) conduit
E) ball bolt
F) bell
G) back tamper swt.
H) wall switch
I) cover closed

Switches B and H need not be exactly where I show them. They can be anywhere along the perimeter of the box. Their why the best way to get at one is to cut out the center of the box with a nibbler tool or large tin snips. Some of the most popular locations for bells are: attic vents on the side of the house, along the roof overhang, on the roof overhang of a porch or patio. Many alarm on-off switches are mounted on metal plates (like regular house switches) that are tamper proofed. If they are mounted in a wood base just cut a hole right next to it and reach in to disconnect or short the wires.

Now its time for silent alarms. There are 2 types, primary transmission and secondary transmission. Primary is the use of leased fone lines by Ka. These lines are continuously open between the subscriber and a central station (CS). They receive no power from the CS. The current is supplied by the alarm subscribers system. It is in the range of 20 volts. If the alarm is triggered the current from the system reverses and triggers a buzzer in the CS. To better demonstrate there is a chart below.

If the fone lines are out the meter at the CS registers "trouble" and the buzzer sounds. To bypass this alarm it is best to make a portable battery operated variable voltage power supply. The range should be from 10 to 40 V. and at least .25 amps. First cut the insulation off the wires and measure the voltage, then set your supply voltage accordingly. Attach the power supply and connect it to the wires(+ to + and - to -) and then cut the fone line on the alarm side. Your supply is now supplying the CS with the supervisory current.

Have fun and be careful!
The Stainless Steel Rat

THE PHILADELPHIA STORY.
PART I

BY
SPENSER MICHAELS

THE FOLLOWING STORY IS AS TOLD TO ME BY
BILL BELL AND SAM JUNKINS.

THIS IS THE STORY OF SEVEN GUYS WHO HAD SOME FUN AND GOT IN BIG TROUBLE BECAUSE OF IT. THEY WERE: BILL BELL, SAM JUNKINS, CAP'T ZAP, STU FIREFLY, KEN W., LARRY F., STEVE P.

THE SEVEN OF US HAD MET DOWN AT Drexel UNIVERSITY THROUGH OUR COMMON LOVE OF PHONE PHREAKING. KEN USED TO OPEN ACCOUNT STUFF FOR HIS FATHER, LEGALLY. SO WE CAME UP WITH THE IDEA OF OPEN ACCOUNTING STUFF FOR OURSELVES.

OPEN ACCOUNTING STUFF IS WHEN YOU PRETEND YOU ARE A COMPANY WITH A GOOD CREDIT RATING (SEE A BOOK CALLED "DUN AND BRADSTREET") AND START ORDERING ANYTHING FROM A PLACE, AND HAVE IT SENT TO A MAIL DROP, WHICH GIVES YOU THIRTY DAYS UNTIL THE PLACE YOU ORDERED YOUR STUFF FROM STARTS GETTING SUSPICIOUS, BY WHICH TIME YOU HAVE CLEARED OUT OF THE MAIL DROP.

NOW WE DON'T RECOMMEND ANY OF YOU DOING THIS AS WE WERE PRETTY DAMN GOOD, BUT STILL GOT CAUGHT.

SO, CAP'T ZAP OPENED UP A MAIL DROP. THE FIRST THINGS WE ORDERED WERE 5 TEXAS INSTRUMENT TERMINALS, WHICH LISTED AT \$2800 A PIECE, BY THE WAY. THAT WAS ALL WE GOT FROM THAT DROP AS WE WERE PRETTY PARANOID AND NOT SURE THIS WOULD REALLY WORK. WHEN THOSE TERMINALS ARRIVED WE REALLY PHREAKED OUT!

THE NEXT FEW MONTHS WERE SPENT ENJOYING OUR NEW TERMINALS AND PLOTTING THE NEXT DROP. THIS TIME WAS DIFFERENT. WE DISCOVERED ANOTHER WAY TO GET WHAT WE WANTED. ----- CREDIT CARDS NUMBERS!! ----- NO, NOT THE KIND YOU CALL TOKYO WITH AND BILL SOME SUCKER, BUT VISA, MASTERCARD, AND AMERICAN EXPRESS.

TO CREDIT CARD THINGS (AGAIN DON'T DO THIS) YOU SEARCH THE DUMPSTERS OUTSIDE OF ANY STORE THAT TAKES CREDIT CARDS. LOOK FOR THOSE PIECES OF CARBON PAPER THAT THEY USE WHEN RUNNING OFF A CREDIT CARD SALE. THIS IS CALLED "FRASHING". NEXT READ THEM! FROM THIS YOU CAN USE THE NAMES, NUMBERS AND IF YOU'RE LUCKY, THE ADDRESSES TOO. THE DIFFERENCE BETWEEN THE BIG THREE CREDIT CARDS ARE: MASTERCARD (MC) = HAS A 4-DIGIT NUMBER ABOVE EX. DATE AMERICAN EXPRESS (AX) = IS MARKED WITH "AX" VISA = THE OTHER ONE

ARMED WITH THIS INFO, YOU CAN MAIL ORDER ANYTHING FROM ANYPLACE THAT ACCEPTS A CREDIT CARD, WHICH ALL MAIL ORDER PLACES DO. AGAIN, HAVE STUFF SENT TO A MAIL DROP, NOT YOUR FRIEND'S HOUSE. YOU HAVE TO BE CAREFUL ABOUT WHEN THE BILLS GET SENT OUT. SOMETIMES IT'S THE 15TH OF THE MONTH AND SOMETIMES IT'S THE 1ST. SO YOU HAVE TO WATCH WHEN YOU ORDER SOMETHING AS TO WHEN THE POOR SLEBS WILL GET THEIR BILLS. IN GENERAL, START MAIL DROPS AT THE BEGINNING OF THE MONTH AND QUIT AT THE END.

NOW CAME TIME FOR THE SECOND MAIL DROP. WE WERE HAVING A HIGH OLD TIME. WE OPEN ACCOUNTED 5 HIGH LOG TERMINALS (\$2100 PER), WE CREDIT CARDED CAMPING EQUIPMENT, HAM RADIOS, TOOL KITS (\$250), MORE CAMPING EQUIPMENT, AND MORE HAM RADIOS. WE WERE AT THE PEAK OF OUR OUTLAWNESS, BUT SOMETHING WAS ABOUT TO HAPPEN...

WHAT IS GOING TO HAPPEN?
WHAT WENT ON AT THE END OF THE 2ND DROP?
WHO SOBALLED? WHO RATTED? WHO'S A FINK?
WHAT WILL BECOME OF US????

FOR THE ANSWERS TO THESE AND OTHER QUESTIONS TUNE IN TO THE PHILADELPHIA STORY PART II, WITH MORE DETAILED INFORMATION AND HEARTBREAK.

Boys on the band

SHREVEPORT, La. — It was an easy drug bust for undercover sheriff's deputies. They bought the marijuana over their citizens band radio.

"We had been made aware of the fact that starting transactions for marijuana were taking place on the CB radio," Cade Parish Sheriff Don Halkaway said.

"We simply had an undercover agent cut three into a CB radio and he was able to successfully make three transactions on the radio."

Three men were arrested and charged with possession and distribution of narcotics. Only small amounts of marijuana were recovered in the arrest. The men were fined in lieu of \$7,500 bond each.

THE INS and OUTS of SCC's
by Dr. PBX

This is my 1st of many articles to TAP. (I hope) I work in the southwest region of the country, for a company referred to as an Interconnect phone Co. You've seen them popping up all over the country and I work for one of the best in the communications field! I will provide up to date fone info and digital switching. Any feedback would be appreciated.

Just what the hell is an SCC? This label stands for Specialized Common Carrier - a name given to those long distance companies in direct competition with AT&T Long Lines. Contrary to common belief, there are only a handful of SCC's out there. Some you know of; MCI, SPC(sprint), some you don't know of; RCA Satellite (1st with voice and data on the same line or multiplexing in phone terms), and good ol' Western Union. That is it, plain and simple. These companies own and maintain satellite space and microwave towers.

Then who are these "other new carriers" Well, there is a new buzzword in Communications-called a reseller. These companies such as U.S. Telephone, metromcomm, United Network Service, etc. don't own any satellite space, but lease it from 2-3 carriers including Ma Bell lines. They resell the line at a slightly higher cost, still be low direct dial day rates. (DDD) These resellers have it made, in that at least one of the SCC's services an area they wish to serve. They even send calls on Wats lines without you realizing it, and they rent the line for X# of dollars per month. The result-many new resellers in the market place with new codes to crack!!! Most use 5 digit authorization codes.

I'd like to concentrate on one SCC that I know th most about, Sprint = SPC- Southern Pacific (railroad) Communications. This particular carrier got smart about 4 months ago with the introduction of the "Travel Code" to stop fraudulent use of codes across the country. (very hard to trace and very costly) If you aren't familiar, sprint users dial a 7 digit local no. to access the computer, then a 6 digit Auth. code, then area code + number. (10 digits, no 1+ needed) This access code is good only in the area code location of your company or area code location of your home fone if an individual account. This is where the travel code comes in: Use other than in your home area code, requires the 2 digit travel code to be dialed after the normal 6 digit auth code. (total 8 digits versus 6 when in home area code.) This provides a great safeguard to keep random fone freaks from cracking codes that could be used outside their home area code. It has been my experience that the travel code is often a double digit (??) for simplicity and ease of memorization. So try 8 digits if you are close to breaking a code!

So, if you can, freak your local "Reseller", chances are he has a less sophisticated system that doesn't use this gimmick yet. They'll put up with it for a while, but don't be surprised if they all have a similar system like the "travel code".....

If you need a dial up for your local reseller, chum up with your communications manager at work or visit a resellers office and ask for a demo and watch what they dial. Once you have the local #, a fone freak can do the rest....

In TAP # 70, an article on the abuse of dial up access was discussed. I agree with the author, to avoid getting nabbed on a SCC network, freak through several links before reaching the end party, if you can stand the loss on the circuit! Make sure you have a "smart" person on the other end who will dummy up if he receives a call about abuse to his home fone #. Use pay fones whenever possible, if you can find one that's quiet (getting impossible isn't it ???)

And as a special treat, below is a list of all dial up numbers to Sprint! Happy Networking.....

Phoney

BIG SANDY, Texas - Continental Telephone Co. apparently thought Gary Thomas reached out and touched a whole lot of people when it billed him for more than \$10,000 in long-distance calls.

Thomas and his wife, Mary Kay, received 11 stacks of itemized bills that took that cost the phone company \$7.99 in postage to mail.

"At first I could have cried, but then it got funny," Thomas said. "It had to be a mistake and it was - belonging to the telephone company."

A keypunch error prompted the long-distance calls of more than 700 residents of the eastern Texas community to be combined and sent to the Thomases.

"We're embarrassed," Continental spokesman Phil Campbell in Dallas said.

A telling tale

ROCKTON - An automatic bank teller machine, assaulted by a frustrated customer, turned out to be an excellent witness.

Lovell Clinton Craig, 23, lost his temper when the machine at the First Bank of Deer Park refused to give him money out of his account.

Craig said he decided to smash the screen with beer bottles and vent his frustrations. But the machine automatically took a picture of an assailant, giving police the identification needed to make an arrest.

Durham said damage to the machine totaled \$3,700.

Craig was charged with criminal mischief and bond was set at \$1,000.

If you want to cut your phone bills, cut out this chart.

Back Issues	are \$.75 each. Issue #50 is \$1.50.

Classified

The TAP Classified Ad Sheet is published as a service to our readers. All ads **MUST** be typed and camera ready. Ads will appear in the next ad sheet unless they arrive after printing deadline in which case they will appear in the following ad sheet. The cost per ad per issue is \$4. If you wish to preserve your anonymity, TAP Box numbers are available at the cost of \$5 per ad per issue. This extra cost is for the postage to mail you the replies to your ad. Full page ads cost \$12 and half-page ads cost \$6. Payment must accompany all ads. Send cash and get a 10 % discount on all ads. Address all ad requests to: TAP, Room 603, 147 West 42nd Street, New York, N.Y. 10036.

SECRET MILITARY DISCHARGE CODES NOW REVEALED!

Secret coding system used to keep behavior, conduct and opinion records. The codes appear in numbers on your discharge from the military. Large corporations, credit bureaus and the police can read codes and know what someone said about you. Now you can know, get new discharge papers without the code numbers. \$5.00 to: Declan Research, POBox 185, Harvard Sta., Cambridge, Mass. 02238

GAS FO' ALL

FED UP WITH THE HIGH COST OF GASOLINE AND DIESEL FUEL? SICK AND TIRED OF BEING ROBBED AT THE PUMPS? THE ULTIMATE ENERGY SURVIVAL PUBLICATION IS FINALLY HERE!! WE HAVE PENETRATED THE TOP SECRET FILES OF A BILLION OIL COMPANY TO PRY LOOSE 18 EFFECTIVE, EASY, SIMPLE, QUIET AND QUICK METHODS OF RIPPING OFF GASOLINE AND DIESEL FUEL AT THE PUMPS!! NO SPECIAL SKILLS, STRENGTH, ABILITIES, LUCK, INTELLIGENCE OR PRIOR TRAINING IS REQUIRED. GAS FO' ALL COMPLETELY DESCRIBES AND ILLUSTRATES INCLUDING MANY PHOTOS! THESE 18 EYE POPPING METHODS, APPLICABLE TO ALL MECHANICAL AND ELECTRONIC GAS AND DIESEL PUMPS AND DISPENSERS ONE METHOD STOPS THE REGISTRATION (BUT NOT FUEL FLOW) SIMPLY BY PLACING A STRONG MAGNET ON THE OUTSIDE OF THE PUMPS!! MOST METHODS REQUIRE ONLY A FEW SIMPLE HAND TOOLS. **ONLY \$12.**

AUTOMATIC TELLER MACHINES

THE MOST BIZZLING PUBLICATION THAT CONSUMERTRONICS OFFERS SINCE GAS FO' ALL! Learn about the more than one dozen methods outlaws are using to turn Automatic Teller Machines (cash dispensers or ATM) into gold mines to be mined at will! This comprehensive publication describes how ATMs work, actual examples of how they have been beaten the many methods used to fool them, and a listing of other popular and very lucrative card rip-offs. The methods, completely described are very effective. One comment: ATMs are the biggest mistake made by the banking industry since they caused the Great Depression. Next time you walk by an ATM in use don't be surprised if you hear a whispered "jackpot". LATER AVAIL- ABILITIES ARE NOT GUARANTEED! **ONLY \$12.**

THE VOICE DISGUISER

Two very effective, inexpensive and simple to build and use Voice Disguiser designs completely described & illustrated. For those who demand private and anonymous conversations. Many other applications include: 1) To accommodate the tone deaf. 2) For homeless practical jokes on a conversation partner as a party pleaser. 3) As a computer and tape age toy or aid. 4) To hear out unwanted noise. 5) To compensate for certain voice deficiencies. **ONLY \$8.**

RENTAL EQUIPMENT!!

Mileage and time registration devices for rental cars, trucks, aircraft, farm equipment, etc. have long been defeated by "Outlaws". We discuss in this lengthy pamphlet the quickest, quietest, simplest and most effective methods of ripping off virtually all rental equipment. Particular attention is devoted to SPEEDO DRIVES and HORSE METERS. More than one dozen photographs and illustrations. **ONLY \$8.**

IRON GONADS

COMPLETELY DESCRIBES & ILLUSTRATES SIMPLE MAGNETIC MEANS OF BLOWING DOWN, EVEN WRECKING, WATTHOUR METERS WITHOUT REMOVING OR BREAKING GLASS COVER. Not related to STOPPING POWER METERS Methods. Do Not Use on Utility Owned Meters. **ONLY \$8.**

SURVIVAL GUNS & AMMO + **SILENCE IS GOLDEN**
Everything YOU must know About Machine Guns, Assault, Rifles, Shotguns, Improvised Guns, Handguns, Silencers and Survival Calibers to Survive the Likely Upcoming Total Collapse. Very Comprehensive Includes Detailed Conversations to Selective Fire AR-15, M16, M14, M1, Etc. Includes Complete Plans of the Homemade SMG of the American Underground. **ONLY \$20.**

SHOPLIFTER!

SHOPLIFTER! is finally here! The unspeakable subject is addressed in full. Many methods are discussed in detail including the modification of Universal Product Codes. Learn the truth about shoplifting, how it's done and the business community's lies and coverups regarding shoplifting. **ONLY \$8.**

THE TOILET TRAINER

THE ULTIMATE WEAPON USED AGAINST BIG-SHOT OPPRESSORS IS FINALLY REVEALED IN THIS SMALL BUT COMPREHENSIVE PUBLICATION. THE TOILET TRAINER IS A DEVICE THAT IS INSERTED INTO THE TOILET, THE TOILET IS FLUSHED AND THE DEVICE EXPLODES WITHIN THE PLUMBING. WE ARE THE FIRST TO HAVE THE NERVE TO DESCRIBE HOW TERRORISTS AND PISSED OFF CONSUMERS SEEK AND OBTAIN A DEGREE OF REVENGE MOST OF US ONLY DREAM ABOUT! **ONLY \$4.**

SCIENCE FOR THE PEOPLE

a bimonthly publication

Our topics include:

- Are Sex Roles Biologically Determined?
- Technology and the Changing Workplace
- The Politics of Cancer
- Military Research
- Technology in the Third World

Science for the People is celebrating its thirteen years as the only progressive magazine solely devoted to the politics of science. We provide a real alternative to the popular science magazines.

Tone dialer

fits mouthpiece

Two-tone encoder screws on to mouthpiece of rotary dial phone, converting it inexpensively to touch tone operation for access to computer services. Soft-Touch compresses all necessary circuitry into 1 cu. in. of space inside mouthpiece. Keys are pyramid shaped to make dialing easy. Registered for direct user installation, adapter fits standard handsets and lists for \$39.95. Buscom Systems, Inc., 4700 Patrick Henry Drive, Santa Clara, CA 95050

PASSPORTS and DUAL CITIZENSHIPS are now available from Castellania.

It is still possible for you to obtain a genuine Passport from the Principality of Castellania in any name you choose. Castellania was established in 1974 and its Passports have been accepted by about 100 countries on an individual basis. Coins and postage stamps from Castellania are or will soon be available also. Many other opportunities exist in areas of "off-shore" banking, formation of companies or corporations, and so forth.

An information brochure, passport and naturalization information and application will be mailed to you, upon the receipt of \$5.00 US.

Address all requests and make payment to:

The Commerical Representative of the Principality of Castellania, P.O. Box 40201, Pasadena, Calif. 91104 USA.
